## **DETAILED ACTION**

## Election/Restrictions

1. Applicant's election with traverse of Group I, Figures 1-8, claims 1-5 in the reply filed on 6/26/07 is acknowledged. No grounds for traversal are presented therefore, the examiner maintains that the election requirement is proper.

The requirement is still deemed proper and is therefore made FINAL.

# Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1,2,4,5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear from the recitation in line 3 of claim 1, "the other end *being* associated with a key-operated locking device", whether this key-operate device is the locking device for actuating the latch member 12, as further recited in claim 5, or if it refers to the lock 50. The claims should be clarified accordingly.

# Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/544,092

Art Unit: 3676

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Page 3

- 5. Claims 1,3,4 are rejected under 35 U.S.C. 103(a) as being unpatentable in view of McDaid 6,317,936. McDaid teaches a portable device lock such as for a computer comprising a block lock body 70 (Figure 3) having a rectangular cavity 74 formed therein with an undercut along approximately 180 degrees of one side thereof, a circular ribbed attachment member 44 having a circular rib 60 extending such that it fits into the undercut portion of the block body, and further provided with a hook latch member 12 for engaging a computer. McDaid fails to teach a block body having a circular or oblong cavity. A change in shape of a structure is generally considered to be within the level of ordinary skill in the art, therefore, to change the shape of the McDaid cavity from rectangular to oblong would have been considered an obvious matter of design choice.
- 6. Claims 1 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over McDaid '936 in view of Myers 5,127,244 or Lee 5,913,907. McDaid fails to teach a push-in type lock for use with the key operated lock device. Both Myers and Lee teach conventional push-in type locks for use with a hook type latching member. It would have been obvious to one of ordinary skill in the art to modify the device of McDaid by providing a push-in type lock as taught by either Myers or Lee as an obvious matter of design choice in substituting one type of lock for another.

Art Unit: 3676

#### Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the circular block cavity of McDaid et al 6,360,405.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suzanne Dino Barrett whose telephone number is 571-272-7053. The examiner can normally be reached on M-Th 8:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jennifer Gay can be reached on 571-272-7029. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
